Software / Application Developer
Johannesburg Area, South Africa

Summary

I don't know who you are. I don't know what you want. If you're looking for ransom, I can tell you I don't have money. But what I do have are a very particular set of skills.

Skills I have acquired over a very long career. Skills that make me an ideal guy to a person like you. These skills include but not limited to HTML, TypeScript, CSS, jQuery, JavaScript, AngularJs, MySQL, PHP, NODEJS, Ionic, Cordova, and Laravel.

If you leave now, that will be the end of it - I will not look for you, I will not pursue you...

If you are still here, I may just build your next great App and publish it on the Google Play Store or Apple iStore

Experience

aceMedia Digital Communications

CTO & Founder

September 2016 - Present (3 years 9 months)

Johannesburg / Cape Town

aceMedia's focus is CRM's , Human Resource Management Digital Tools and Hybrid Mobile App Development.

You can engage Business and Friends through social media, and more. They install on your device and can be found on the app stores.

We are defined by a devotion to brands and a dedication to ideas. Because ideas change the world and lives of people. And through technology we embrace the idea of the symbiotic relationship between the two. Drawing from the best of both international and local best practice.
